

‘Your application suites hosted on powerful and totally secure servers,’

More than 40% of today's IT development budgets are devoted to the integration of applications and their associated data into the existing IT systems. This represents a significant strategic issue for companies. Such integration of new applications and data into existing systems requires mounting major projects, often complex and costly. Application hosting offers an appropriately robust solution to such issues.

SyselApps is a collection of editor-approved hosted applications. The applications are hosted either on a dedicated platform (PaaS) or on a shared platform (SaaS). These platforms offer a totally managed service where all available resources are made available to the application to ensure optimal performance.

EFFECTIVENESS

- ✓ **Platforms managed** by qualified staff using leading-edge infrastructure technology.
- ✓ **Resources used as required** to ensure optimal functioning of the application.
- ✓ **Delegate your requirements and focus on your core business:** we'll provide the solution for you.
- ✓ Data can easily be recovered thanks to the **default five-day retention period**.

MOBILITY

- ✓ **Your applications accessible from anywhere in the world and at any time of day.**
- ✓ Access to your applications **from any appropriate device** (tablets, smartphones, PCs, thin clients, etc.)

FLEXIBILITY

- ✓ **Rapid implementation**, no roll-out required.
- ✓ **Automatic updates applied** to your applications.
- ✓ **Simple scaling up of the number of users** accessing the application.

PERFORMANCE

- ✓ **Using the applications is just as if they were local** with a simple and powerful access mechanism.
- ✓ **State-of-the-art infrastructures** in two physically distinct and fully redundant Data Centres.
- ✓ A « **High Performance** » version of the platforms is available for the more demanding requirements.

SECURITY

- ✓ **Access to your applications is encrypted and secured** using a strong authentication option via Token.
- ✓ The guarantee **that your data is both stored and managed solely in Switzerland.**
- ✓ Automatic encryption during data transfer.

SAVINGS

- ✓ Simplified budgeting with **no hidden costs** : a **fixed monthly fee per user**.
- ✓ No need for local installation of applications and **no change to your own infrastructure.**
- ✓ **No infrastructure costs** and no internal knowledge required.
- ✓ Improved management of your IT costs : **pay only for what you really use.**

GUARANTEE

- ✓ All our services come with our satisfaction guarantee : **3 months satisfaction or your money reimbursed.**
- ✓ High Availability: our SLAs (Service Level Agreements) **guarantee 99.9% availability.**

OPTIONS

- ✓ **SyselBackup** : **backup and archiving of your data** using 10 daily snapshots and 24 months of history.
- ✓ **SyselContinuity:** improved security **with business up and running guaranteed** for the « next business day ». No need to wait for purchase, delivery, installation or configuration of new equipment.
- ✓ In the case of a major disaster SyselContinuity guarantees the previously defined RTO (Recovery Time Objective).
