

‘Backup and archiving of all your data with 100% accessibility!’,

There has been more information produced during the last thirty years than was produced in the five thousand years before that. This simple fact highlights the increasing importance to enterprises of storage and backup for their electronic data. Such electronic data represents the history, the know-how and the value of the company. The need for a reliable, effective and powerful backup mechanism is therefore absolutely essential.

Based on the latest Cloud Computing virtualisation and storage technologies, SyselBackup is a fully secure total system for backing up your systems and your data. As the solutions are hosted in our two Data Centres in Western Switzerland, you the customer have nothing to worry about concerning equipment and data manipulation.

SIMPLICITY

- ✓ Depending on your requirements, you specify the volumes to be backed up, the frequency and the period during which they are to be kept. Our technicians take charge of setting up the solution and running the procedures, leaving you with full access to the backup system.
- ✓ With outsourcing, there is no need to have recourse to the bank's strong room: the data is already there!
- ✓ No constraint for increasing your backup volume requirements.
- ✓ Weekly reports produced concerning the integrity and state of the data.

STORAGE

- ✓ Disk to disk copies carried out using the incremental block level backup mechanism.
- ✓ Full-time management and monitoring of backups.
- ✓ Your data will be stored on disks in a dedicated environment, fully secure and totally separated from data from other customers.

PERFORMANCE

- ✓ Possibility to synchronise several servers on to a single backup site (server to server or multi server to single server).
- ✓ A light but efficient use of your band-width.
- ✓ Solutions on Veeam Backup & Replication and Veeam Cloud Connect.

SECURITY

- ✓ The guarantee that your backup data is both stored and managed solely in Switzerland.
- ✓ For all data transfer, encryption is automatic. In addition, only segments that have been modified are transferred during backup operations, not the whole file.
- ✓ Backups are duplicated in our second Data Centre for optimal security.

DATA RECOVERY

- ✓ As a standard, there are 2 x 5 days of data retention for backups, plus a 24 month historical view (monthly views of all data).
- ✓ You have the capability of restoring data yourself, either a complete volume or a single file, from the backups taken by SyselBackup.

GUARANTEE

- ✓ All our services come with our satisfaction guarantee: 3 months satisfaction or your money reimbursed.
- ✓ High Availability: our SLAs (Service Level Agreements) guarantee 100% availability of any backup data.
